

VSB 218

features:

- superb efficiency
- clean powerful bass
- very high SPL output
- built in wheels
- hand crafted

The VSB 218 is a very powerful 2 x 18" subwoofer that is suitable for medium/large sized indoor events, or outdoor events where medium/long throw bass is desirable. Our V internal structure which cause booming.

The VSB 218 was designed to reproduce very low frequencies, with a medium projection, as a single box. But when coupled you will achieve a high output long throw sub. We use a minimal amount of processing (in our own processor) simply to extend the low frequency response while preventing over excursion of the cone. This processing is inaudible and makes these boxes almost indestructible.

The VSB 218 has a useable frequency range from 30Hz-100Hz.

1 x VSB 218 will give you 101dB sensitivity @1w/1m.

Maximum continuous S PL 128dB @1m.

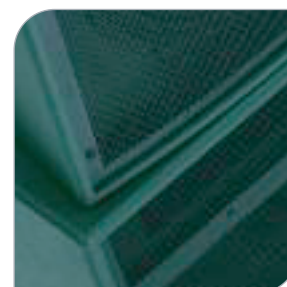

Coupling 4 x VS B 218 gives a maximum continuous S PL 137dB @1m.

applications:

- indoor/outdoor
- install /tour
- club and venue
- event and conferencing

permanent installations in:

- auditoriums
- theatres
- clubs and bars
- places of worship

specifications

Type	Medium/long throw subwoofer
Driver	2 x 18" Neo 4" voice coil, Extended low frequency drivers
Power handling	2 x 1000W AES
Frequency response	30Hz ÷ 80Hz
Recommended amplifier	2000W @4 ohms
Sensitivity	101dB @1w/1m
Maximum SPL	1 x 218=128 4 x218=137dB @1w1m
Nominal impedance	2 x 8 ohms
Dispersion	100 x 80
Crossover point	30Hz and 80Hz
Connectors	2 x Neutriks NL Speakons
Dimensions	Height 1175mm, width 600mm, depth 900mm
Weight	108Kg
Construction	18mm birch ply finished in textured water resistant Noise Control Audio green with bespoke powder coated protective grill
